

§ 360.104

however, import licenses that were valid on the date of importation but expired prior to the filing of entry summary documents will be accepted.

(e) *Correcting submitted license information.* Due to data security issues, it will not be possible to alter an existing license electronically once it has been issued. However, prior to the date of entry summary, filers will be able to cancel previously issued licenses and file for a new license with the correct information. If the filer prefers to have Commerce personnel change the license, there will be a phone/fax option.

§ 360.104 Steel import surge monitoring system.

(a) *In general.* (1) Throughout the duration of the licensing system, Commerce will maintain a surge monitoring Web site that will report certain aggregate information on imports of section 201 product categories obtained from the steel licenses. Aggregate data will be reported on a monthly basis by country of origin and section 201 product category and will include import quantity (metric tons), import Customs value (\$U.S.), and average unit value (\$/metric ton). The monitoring Web site will also present a range of historical data for comparison purposes.

(2) Reported monthly import data will be refreshed each week with new data on licenses issued during the previous week. This data will also be adjusted periodically for cancelled or unused steel import licenses, as appropriate.

(b) *Excluded products.* At this time, Commerce will not be separately reporting aggregate data on excluded products. However, this information will be available for review by the appropriate government agencies.

§ 360.105 Duration of the steel import licensing program.

The licensing program will be in effect for the duration of the safeguard measures only. Licenses will be re-

19 CFR Ch. III (4-1-03 Edition)

quired on all subject imports entered during this period, even if the entry summary documents are not filed until after the expiration of the measures. The licenses will be valid for 10 business days after the expiration of the safeguard measures to allow for the final filing of required Customs documentation. Information collected under this system will not be kept longer than the period of time legally required beyond the expiration of these remedies.

§ 360.106 Fees.

No fees will be charged for obtaining a user identification number, issuing a steel import license or accessing the steel import surge monitoring system.

§ 360.107 Hours of operation.

The automatic licensing system will generally be accessible 24 hours a day, 7 days a week but may be down at selected times for server maintenance. If the system is down for an extended period of time, parties will be able to obtain licenses from Commerce directly via fax during regular business hours. Should the system be inaccessible for an extended period of time, Commerce would advise Customs to consider this as part of mitigation on any liquidated damage claims that may be issued.

§ 360.108 Loss of electronic licensing privileges.

Should Commerce determine that a filer consistently files inaccurate licensing information or otherwise abuses the licensing system, Commerce may revoke its electronic licensing privileges. The filer will then only be able to obtain a license directly from Commerce. Because of the additional time need to review such forms, Commerce may require up to 10 working days to process such forms. Delays in filing caused by the removal of a filer's electronic filing privilege will not be considered a mitigating factor by the U.S. Customs Service.
